BESKRIVELSE

Town house in the center of Pego (Alicante) Spain. The house has a total of 180 m2 and consists of three storeys. The basement is like the old manor houses with stucco on the ceilings and pillars decorated with very large doors that separate the rooms, etc. The second floor consists of a spacious entrance hall with wooden double doors with reliefs, 1 bedroom, cute living room, kitchen, bathroom with toilet, storage room and courtyard. The first floor consists of two rooms. The second floor has not been laid out totally, it is about and area of 40 m2 and is used actually as a studio. Also at the rear of a terrace area there are very nice views to the valley. Only 15 minutes from the beach, highway and the shopping center in Ondara away.
